HORSE CARE

EQUUSIR BIONIC CARE

Produced in a highly specialized electrolysis process, BIONIC products have an antibacterial and fungicidal effect on water, salt and electricity - these are the raw materials of the EQUUSIR BIONIC care products. Precision in production ensures the high-quality standards. Energy sparing and free of chemicals, the EQUUSIR BIONIC care products are produced directly from mountain spring water.

EQUUSIR BIONIC meets all the legal parameters of the Drinking Water Ordinance (TWVO, EN 901) as well as the drinking water disinfection meets according to DIN EN 901. it is free of side effects and meets the Anti-Doping Guidelines of the FEI.

EQUUSIR

THE BEST FOR YOUR HORSE

DISINFECTION

EQUUSIR BIONIC DISINFECTION penetrates the cell wall and changes the osmotic pressure inside the harmful cell. Bacteria and viruses cannot withstand the higher pressure and are „blown up“.

Helps with external and internal infestation of fungi, viruses or bacteria. Disinfection of wounds, bacterial or fungal skin diseases, thrush, mud fever and against any microbial contamination.

Characteristics:

- FIGHTS 99.9% OF ALL VIRUSES AND BACTERIA
- PH-NEUTRAL
- CUTANEOUS TOLERANCE
- SHORT EXPOSURE TIME
- NO RESIDUES

Fields of application:

- GERM CONTAMINATION IN THE HOOF
- SMALL INJURIES
- DETOXIFICATION TREATMENT
- INHALATION TREATMENT
- DISINFECTION OF DRINKING WATER AND INDUSTRIAL WATER

REGENERATION

Free radicals are formed during metabolic processes. They are short one or more electrons. EQUUSIR BIONIC REGENERATION (antioxidant or „radical scavenger“) protects the cell from damage by releasing excess electrons to the free radical, thus neutralizing the harmful effect.

Physical stress (e.g. in competitive sports) can increase the salt concentration of the body. BIONIC REGENERATION is a motor for neutralizing toxins in the body. Existing vital substances are transported directly into the cells and waste products are eliminated.

Characteristics:

EQUUSIR BIONIC REGENERATION is an alkaline, cell-compatible care product for skin, coat and mane. After injuries, in case of skin irritations, to care for the coat after fungal infections, mud fever or insect bites, it calms the tissue without burdening it pharmaceutically.

With a pH value of 10 to 13, EQUUSIR BIONIC REGENERATION has a basic character and neutralizes excess acids.

Fields of application:

- HOOF CARE AND REGENERATION
- CARE FOR SKIN AND COAT
- DETOXIFICATION TREATMENT
